

## Brief of Work

The speaker recalls the memories of being a child in Hong Kong and being in Central with the amah in the poem. The artwork aims to portray the speaker's memories of Central in the past.

History and memories remind us of our past, as well as our culture and traditions.

Our past was important and meaningful for us because it shapes who we are in the present.

Many shop signs and neon signs in the past were shown in the artwork to highlight the importance of conserving history.
