

Selected Value: Perseverance and Benevolence

The Yellow Seahorses – Quite a Unique Bunch!

The yellow seahorses, quite a unique bunch they are!

They stand out with their special shapes, cute little all-stars!

The male seahorses are excellent parents and that's quite apparent.

They protect their children, even if there are as many as eleven!

When the seahorses' tails attach to corals, they'd hardly
ever detach as that's their moral.

For their children, they'd persevere through anything, in
another life, they'd probably be kings!

The yellow seahorses are as perseverant and benevolent
as they can be,

let's be like them together, you and me!
