

Selected Value: Unity, Commitment

Special Harmony

**Scavenging food, through currents they glide
Never in separation, they hop tide to tide
In love and commitment bears their will to survive
Paired in synchronous unity no force can divide
Every fish swims with the purpose of one
Fins in parallel until their deed is done:
In united commitment to feed their young
Sailing scale to scale, swimming side by side
Harmony in a species nourishes growth, and binds**
